*Fight to control your own destiny!*  
After you saved the entire city of Phlan and located the Pool of Radiance, a simple trip to Tilverton should have been as easy as a noon-day stroll. But it wasn't...

Ambushed, captured, and knocked unconscious, you awake with no idea who attacked you or how you arrived in Tilverton. You only know that five azure-blue symbols are imprinted just under the skin of your right arm.

The mystical power of the azure symbols ensnares your will like metal bonds! And when the bonds glow, you must do as they command. No magic dispels the bonds and no cleric's prayers remove them.

Your only hope: search the Forgotten Realms for members of the alliance who created the bonds and regain control of your own destiny. Only then can you be free of the Curse of the Azure Bonds.

DRAGONS OF FLAME explodes with action! Control up to ten Companions, one at a time. Your quest: rescue slaves held by the ravaging Dragonarmies in the foul fortress of Pax Tharkas.

Your journey begins as the Companions explore the wilderness of the Elven Mosaic where they gain valuable allies — the mysterious elves of Qualinesti.

Each Companion has different specialized skills. Use them wisely along the way to evade evil Draconian patrols. Keep one step ahead of the malevolent Dragonarmies while battling dragons, griffons, wraiths, zombies and scores of other monsters!

The terrors of the journey, however, pale in comparison to the sheer horror of your destination. The impenetrable fortress of Pax Tharkas looms before you, cracking with vile energy.

Remember, all the sizzling action happens in real time and in colorful animation. Your wits and reflexes better be sharp. In this game, you're either quick...or you're dead.

Welcome to the first AD&D® computer wargame. Prepare for fierce battles and all-out war when the forces of Whitestone clash against the evil Highlord Dragonarmies. The prize: absolute rule over all Ansalon in the DRAGONLANCE® game world of Krynn. Choose sides against another human opponent, or command Whitestone against the computer. Send forth your diplomats to forge treaties and gain the allies that will swell the numbers of your troops. When words fail, armies of humans, draconians, dwarves, elves, dragons, and other creatures may prove more persuasive. See armies move across the lands of Ansalon using the strategic map, or zoom into the overview map to direct the war on a tighter scale. Select the tactical view to watch details of the battle unfold. During the course of the game, players can send groups of champions on quests to discover magic items. Dragonlances, good dragons, dragon orbs and gnomish technology may help to defeat the enemy. Enough talk. Let the war begin!

DUNGEON MASTERS ASSISTANT, VOLUME II: CHARACTERS & TREASURES is SSI's latest time saver for Dungeon Masters (DMs). No longer is it necessary to spend hours populating a town or generating player characters or henchmen. Speed up your game immeasurably by generating detailed player or non-player characters, and large treasure hoards, in moments! Every facet of character generation, from languages and spell lists to class and racial abilities, is accounted for. All character classes, including multi-class characters, can be rolled up in a snap and will appear on ready-made character sheets with all the pertinent information ready to use. You can even print these sheets for instant use. All magic items from the AD&D® *Dungeon Masters Guide* and *Unearthed Arcana*, plus all treasure types from the *Monster Manual* and *Monster Manual II*, can be generated with this powerful program. By letting the computer do most of the number-crunching work, such time consuming chores as creating large numbers of gems, jewelry, or intelligent weapons become simple tasks. Harness the power of the computer with this versatile utility — spend less time in preparation and more time enjoying AD&D® game play.

SSI's DUNGEON MASTERS ASSISTANT, VOLUME I: ENCOUNTERS is the original computer-aid for Dungeon Masters. With thousands of separate encounters, monsters and characters provided, it can reduce game prep time by several hours per session. DMs can modify the existing data or add original monsters and encounters to the database! And the database is prodigious indeed: Over 1000 encounters and over 1300 monsters and characters, including all monsters from the AD&D® *Monster Manual I* & *Monster Manual II*. Monster records and encounter printouts total several hundred pages! (A printer is *not* required in order to use this product: data can also be output to disk or screen!)

In 1941 Hitler looked to the East. He saw the vast resources of the Soviet Union, the broad Russian bread basket in the Ukraine, oil in the Caucasus mountains. The great prize that was Russia would be his for the taking. German intelligence revealed that Stalin was reorganizing the Soviet military. Soon, the uneasy peace on the Eastern Front would be shattered. If Russia was to be taken, now was the time to act.

On June 22, 1941, Hitler acted: Operation Barbarossa was launched and for six long months German troops plowed through the Soviet Union — only to be stopped by Russian stalwarts at the very gates of Moscow!

**Second Front™** is a division-level strategic game on a grand scale. The map extends from Berlin in the West to Stalingrad in the East, and covers the entire Russian Front. Each player starts with over 150 Divisions, with asset information available to the individual tank, plane and infantry squad level.

IBM DISPLAY

**Sword of Aragon™** is a fantasy game that gives you more than flashing swords and arcane sorcery. It is also a strategy game that requires plotting and planning if you are to win.

Raise and equip an army of bowmen, cavalry, infantry, mages and priests. Hire mercenaries if you must. Just remember that, even in a magical world, you still have to deal with the harsh realities of limited budgets and resources.

Lead your army against the demonic rulers of the Eastern Realms — while defending Aladda against the plundering raids of Goblin hordes. Move across the strategic map and zoom into the tactical map when it comes to battle against human and inhuman monsters. Your warriors, knights and rangers fight with swords, bows and lances while the priests and mages wield magic spells. You, however, must make the right decisions if your forces are to be victorious.

The task that lies ahead is daunting. But the rewards are great. Imagine how glorious it will be to sit on the Emperor's Throne and call all of Aragon yours!

**Storm Across Europe™** is a fast, exciting game that allows you to simulate World War II on a grand strategic scale — in as little as one evening! Every part of that raging conflict is covered — from North Africa to Sweden, from Gibraltar to the Ural Mountains in Russia. Each game turn represents three months of action.

You control every facet of the war. Move armies across the map to conquer territory. Mount amphibious landings. Launch huge U-boat campaigns in the Atlantic. Carry out strategic bombing strikes against enemy production centers. Send raiding fleets to cripple your opponent's shipping. And drop paratroop forces on enemy positions.

While the battle rages, you must constantly juggle limited resources between production and advanced research.

Multiple scenarios and the ability to change starting levels for each country allow for endless variations. Up to three players can play this game, with the computer able to control the Allies and/or the Russians.

C-64 DISPLAY

**Red Lightning™** is SSI's explosive depiction of the potential war in central Europe between NATO and the Warsaw Pact.

As the Soviet player, your mission is to sweep aside NATO forces and capture the Ruhr.

As the NATO commander, you have the more challenging task of repelling the invasion — while attempting to maintain the alliance in the face of mounting casualties.

Painstaking military research by our game designers makes this simulation as advanced as the weapon systems used in modern land and air combat — such as the Soviet T-80 tank and the U.S. F-117 Stealth Bomber.

Any Soviet aggression will surely extend to Norway, Iceland and the North Atlantic. The battles in these regions greatly affect the outcome of the war in West Germany and are fully accounted for in this game.

Three scenarios, five difficulty levels and multiple options challenge the avid wargamer to explore the myriad possible outcomes should World War III erupt!
