 Title: Steve Wozniak MAUG meeting
 Keys: STEVE WOZNIAK MAUG MEETING

Edited minutes of the 10/16/83 MAUG meeting with guest speaker Steve Wozniak, creator of the Apple II computer. Part one of four parts. 20 minutes (in one chunk) or so were lost when I was dropped by the system. This is the only catalog entry for the four files.

PAGE 2 HAS III INFO

3 pages

(30,MAUG DEMO) hello
 (30,Pete Kosel) ?
 (30,MAUG DEMO) What, pete
 (30,Pete Kosel) who is MAUG DEMO?
 (30,MAUG DEMO) I don't know who MAUG Demo. next question, Bart Thomas?
 (30,Pete Kosel) is woz MAUG DEMO?
 (30,MAUG DEMO) Q from Ed Bernstein?
 (30,Ed Bernstein) ARE YOU WOZ?
 (30,MAUG DEMO) YES, I am WOZ
 (30,Pete Kosel) Aha!
 (30,Ed Bernstein) ARE YOU UNABLE TO TALK ABOUT NEW HARDWARE?
 (30,Shawn/Alt Sysop) Woz==> type /HAN and change your handle...
 (30,Bill S/Alt Sysop) Woz==>Type slash han, and reenter Woz
 (30,MAUG DEMO) I can talk about new hardware
 (30,Ed Bernstein) WOZ, COMMENT ON PEANUT OR NEW APPLE HOWE UPCOMING?
 (30,David Humphrey) What's the best modem for the apple?
 (30,woz) I like Apple Cat II. Peanut is Edsel, not enough dealer margin, not enough
 (30,woz) home software yet.
 (30,Bill Cook) Go Roger Kaplan
 (30,Roger Kaplan) Is the atmosphere at Apple as "homey"
 (30,Roger Kaplan) as it used to be, or is it becoming a monolith
 (30,Roger Kaplan) like IBM?
 (30,woz) Apple is more of what it began as than any other large successful
 (30,woz) computer company, but is well managed with greater structure.
 (30,woz) Q from Bill U?
 (30,Bill U) I purchased an Apple DMP printer a year ago.
 (30,Bill U) At that time Apple's ads were touting both the printer's
 (30,Bill U) excellence and the extensive dealer support.
 (30,woz) I like DMP but don't like Apple's direction
 (30,woz) towards serial only version
 (30,Blake Edwards) CAN YOU COMMENT ON APPLE'S STOCK

Apple][Info

(30,woz) Apple's stock, even when it went down was twice the year before,
(30,woz) just after the most successful quarter (gross) ever,
(30,woz) the company could NOT be healthier with over \$100 M in the bank (no debt)

(30,woz) and great developments on the way, and //e sales in great shape.

(30,Blake Edwards) WHAT WILL THE EARNINGS REPORT BE LIKE

(30,woz) Fred B--//+ should get a card soon to make //e compatible!

(30,woz) Blake--I'm not a finance man, but I have Apple stock on margin

(30,woz) well above what I own!

(30,woz) Ed Learned Q?

(30,Ed Learned) WOZ, 2 QUESTIONS, FIRST ON THE CARD FOR THE 2e,

(30,Ed Learned) will it function also with the II?

(30,woz) Ed, the card to make a][+ into a //e is not in works yet but I'm screaming.

/// (30,woz) It will work on II..

(30,woz) Joe Murphy next, /// support group is small (related to revenues) but ongoing

(30,woz) forever as long as sales.

(30,Joe Murphy) What can you tell us of the mouse for the Apple ?

(30,woz) First we had the II, one of the most successful products ever.

(30,woz) We worked as fast as could and made good choices without strong engineering management.

/// (30,woz) We expanded to a 2-product company with the /// and one of the downfalls

↑ (30,woz) was that we were TOO SMART. We knew the proper

(30,woz) ways to do all sorts of things and we didn't allow hackers

(30,woz) to do things their own random ways. I feel that we were wrong to believe

(30,woz) in our 'religion', users should only use a good produce (like SOS)

(30,woz) if it's better for their application, not because the company

(30,woz) (Apple) feels only one way is right. It's a good lesson to learn.

The ///

(30,woz) is still difficult to find out how to do your own thing on.

/// (30,woz) Lesson TWO--The initial impression of any machine from APPLE

(30,woz) will be remembered for years even when problems (lack of software), hardware

(30,woz) are corrected.

(30,woz) But MAC does not have color or slots

(30,woz) Go ahead, Lynn

(30,Lynn Beck) WHY DONT ONE OF THE SYSOP TAKE DOWN NAMES OF PEOPLE

(30,Lynn Beck) THAT WANT TO TALK AND THEN CALL THEM...

(30,Lynn Beck) THAT WAY WE DONT KEEP GETTING QUESTION MARKS BETWEEN TIMES

(30,woz) Great suggestion

(30,Bill C/Alt SYSOP) I have a printer on line

(30,Bill C/Alt SYSOP) Let them rip

(30,Bill C/Alt SYSOP) ok time s up

/STA

(30)58*

(30,Bill C/Alt SYSOP) kael is first go

(30,woz) Kael ok

(30,Kael Smith) As to new products for the II series of Apple line...

(30,Kael Smith) Will things like the mouse (mentioned for the //e be made available for..

(30,Kael Smith) the][+?

(30,woz) John Scully has been very vocal on the II family direction.

Apple II Info

% NTWCPR - Communications Problem, PLEASE WAIT.(CUD 00134 050)

*** 15-20 MINUTES LOST HERE ***

Welcome to channel 30
(Channel) users tuned in
(30)48*
(30,David Cusimano) I HAVE II, IIE, AND LISA. WILL THE MAC, III, AND IIE BE
(30,David Cusimano) DESKTOP COMPATIBLE WITH THE LISA ?
(30,woz) ok
(30,David Cusimano) WILL SOFTWARE TAKE-OFF FOR LISA ?
(30,woz) BUSINESS SOFTWARE will come out fro LISA but not from every
(30,woz) young entrepenour trying to make their first
(30,woz) product like with the II.
(30,woz) Most of the vertical markets are supplied with software
(30,woz) from Apple at time of purchase. Next please
(30,Bill C/Alt SYSOP) Jack Kobzeff is next
(30,Jack Kobzeff) TWO QUICK ONES
(30,woz) jack ok
(30,Jack Kobzeff) I ENJOYED BOTH "US "1 &2 AD HOPE TO SEE 3
(30,woz) May be a couple of years for US #3--working full(!) time at
(30,woz) Apple--can't be interrupted for those nightmares. but at
(30,woz) least they will always be unusually great, especially for the
(30,woz) 20,000 who came from every state and camped out for 3 days.
(30,woz) Fred ok
(30,Fred G. Povey III) ok
(30,Fred G. Povey III) woz, are you involved with the CPM card at als, and
(30,Fred G. Povey III) if i go with prodos, will
(30,Fred G. Povey III) i be able to use both prodos and
(30,Fred G. Povey III) cpm card coresident on aprofile hard disk
(30,Fred G. Povey III) thnx
(30,woz) ok
(30,woz) Prodos is not a sophisticated enough op sys to handle itself and
(30,woz) CP/M concurrently.
(30,woz) Bill--who's next
(30,Bill C/Alt SYSOP) Mike Cohen
(30,Mike Cohen) Ok.
(30,woz) Mike ok
(30,Mike Cohen) will it be able to support more than 128 k of memory? Also,

END
