OVERVIEW

Downhill Challenge is a ski simulation game featuring 4 exciting events from the popular sport of Downhill Skiing.

A player may control the skier with either a joystick or keyboard. For information on the joystick/keyboard combinations that are possible for your particular computer system, please read the section of this manual that is specifically for your version of the program.

There are two play options:

- Training
- Competition

TRAINING

You can practice the following sports by selecting the **Training** mode:

- Slalom Skiing
- Downhill Skiing
- Giant Slalom Skiing
- Ski Jumping

Once a sport has been selected, you may choose a level of difficulty by selecting the color of the run (Blue is beginner, Red is advanced, and Black is for expert skiers)

BOOKING OFFICE

Selecting the **Competition** mode will allow you to compete against other players or even the computer. Before being able to compete against several players, you will have to register them by selecting the **Booking Office** option in the main menu.

To add players to the list, simply move the cursor to the Greater Than (>>) symbols at the top of the screen and press **Return** (Enter if IBM). The new field will be activated. To enter the new name, place the cursor over the field, press **Return** (Enter if IBM), and type the name you desire. Select **Exit** to go back to the main menu.

To delete players from the list, select the Less Than (<<) symbols and press **Return** (Enter if IBM).

Note: To compete against the computer just type "Computer" in a field. (After selecting a field, pressing the **Tab** key will have the same effect – **CTRL** key on a Commodore 64).

SCORES

Selecting **Scores** in the main menu will allow you to see the top scores in each disciplines:

Just select a sport and the screen will display the name and score of the top three players. Select **Exit** to go back to the main menu.

MAIN SCREEN

After selecting the play option (training or competition), and the sport (downhill or slalom), the screen will display the following information:
