8/16-Central

/ES.CENTRAL.9107

In the root directory you'll find ABOUT.THIS.DISK, which is an editorial. It also includes a complete catalog listing of the disk. DLT8 and DLT16 also live in the root. If you're a IIgs user, launch DLT16 (with GS/OS active) and then you can read all the articles this month simply by clicking the mouse. 8-bit users should launch the program DLT8 from BASIC.SYSTEM (which is also on the disk). DLT8 was created by Karl Bunker. The 16-bit front-end was created by Jay Jennings using HyperStudio and operates under the HyperStudio run-time package.

/ES.CENTRAL.9107/Advertising

For sale, for hire, etc., can be found in CLASSIFIEDS. If you'd like information on running an ad, read ADVERTINFO for details.

/ES.CENTRAL.9107/Apple.II/FrontEnd

Harold Portnoy presents assembly source code that will help you create front ends for your programs that are Prosel-like in action. There are several source code files with cool tips scattered throughout.

/ES.CENTRAL.9107/Apple.II/Awp.2.Txt

The man behind Dogpaw, Sneeze, and DLT/8 is back with a routine that can be added to your Applesoft programs. Karl Bunker presents a routine will allow you to read AppleWorks word processing files from BASIC. Assembly programmers can also get a lot of mileage from the source code.

/ES.CENTRAL.9107/Apple.IIgs/Animation

In the February issue of 8/16-Central, Derek Young showed us how to display 3200 color pictures. Derek is back with information on IIgs animation, including sideways scrolling text and a bouncing happy face. :)

/ES.CENTRAL.9107/Apple.IIgs/Icons

Dr. Doni Grande shows us how to do something that was impossible before now...use icons in resources for custom icons in AlertWindows. Orca/C source code included.

/ES.CENTRAL.9107/Columns

In WHATSNEW you'll read about the latest tools and utilities available for programmers.

/ES.CENTRAL.9107/Columns/HyperLab

A regular column devoted to the technical aspects of HyperStudio, HyperCardIIgs, and any other hypermedia programs that pop up. This month we take a look at Nexus, a different kind of hypermedia program.

/ES.CENTRAL.9107/MiscInfo

If you'd like to write for 8/16-Central, read the AUTHORGUIDE and ARTICLESWANTED files for special tips. We've also included a listing of previous 8/16 articles in BACK.ISSUES (and info on ordering back issues on disk). Read the CREATEDBY listing to see who helped put this issue together.

/ES.CENTRAL.9107/Q.And.A

Letters to us, answers from us. Write in with a suggestion, comment, or question and become famous. Online Tech-Talk is a collection of questions, answers, tips, and hints, from the online services.

Oops!

The file CONTENTS in this issue of *8/16-Central* has a boo-boo. Disregard it. This insert actually has the correct information on it. Thanks.

KansasFest • July 16-21, 1991

Check this issue for all the details on the premiere Apple II programming conference.
Complete session descriptions are now included in the Q.AND.A/KANSASFEST file.
